

E8

Auto CPR System

IP44, Anti-shock

anti-interference, dust and water spray resistant,
designed for out-of-hospital transport

Synchronized Therapy

E8 can connect with Amoul® ventilators using Bluetooth technology, allowing for synchronized ventilation. Additionally, E8 CPR offers safer and higher quality CPR, ultimately increasing the patient's chances of survival.

RTCA/DO-160G approved
for using in helicopter

Auto CPR System

RTCA/DO-160G EN1789

- 30:2 & continuous compressions
- Conform to the latest AHA and ERC resuscitation guidelines

- Adjustable compression depth from 30 to 55 mm continuously

- Battery-driven without need for gas supply
- Allow operating while it's charging

- Compact & lightweight (3.5kg)
- Easy to carry and quick install

Safe and effective

- The slow start allows the body enough time to adapt to compression, which can help reduce the risk of fractures
- By combining the benefits of the cardiac pump and thoracic pump, 3D compression reduces the compression's impact and prevents harm to the patients

Improved CPR quality

- The slider and buckle system wraps securely around the patient's chest to assure safe & high quality CPR to achieve a great Chest Compression Fraction (CCF)
- By treating the underlying cause during CPR, extends the effectiveness of treatment

External controller monitor

- Intuitive display of compression frequency, depth, mode, timer, pause duration, battery level, and Bluetooth connection
- The adjustable parameters include compression frequency, depth, mode, date and time, data transfer, and language
- Easy device access through USB, Bluetooth, and Wi-Fi

Smart Controller & Monitor

- 2.4" TFT color screen with real-time feedback
- Intuitive User Interface
